

VEHICLE TESTING TECHNOLOGY SIDE-SLIP TESTER

SST II
VP 420009

SST II VP 420009

The side-slip tester SST II ensures that the axle geometry is inspected within seconds once the test vehicle passes over it (up to 2.0 t axle load) as well as a fully automatic evaluation of the deviation in m/km. The display of the measurement values is either analogue via dial or via transmission to a PC screen (including graphic display).

PRODUCT DETAILS/ACCESSORIES

Description:

- Inspection of axle geometry in a matter of seconds upon drive-on
- Fully automatic analysis of variation in m/km
- In conjunction with EUROSISTEM: display on PC screen with measurement visualisation and graphic representation
- In conjunction with LON brake testers: illustration of measurements on dial analogue displays

- Varnished with high-quality powder coating: anthracite grey, RAL 7016

Standard Delivery:

- Side Slip Tester MINC II EURO Floor Assembly
- Pre-configured for connection to EUROSISTEM or LON test line
- Pre-configured for stand-alone use (requires MCD 2000 communication desk with electronics)

TECHNICAL DATA

| | |
|-----------------------------------|---------------------|
| Axle load | 15000 kg |
| Measurement range | +/- 20 m/km |
| Drive-over speed | 5 - 7 km/h |
| Floor unit dimensions (H x W x L) | 135 x 770 x 1020 mm |
